CIE-Group Ltd and Clank Tech

Project: System Integration & Data Migration

Having a well-established distribution business in the UK, over 60 years serving the Security and Professional Audio markets, CIE-Group have been working to improve software solutions and enhance our customer service levels.   With the need to integrate various systems we turned to Clank Tech for their expert advice, support and solutions..

Handling projects within a business that's not part of the 'day-to-day' can seem like a chore but working with Clank Tech was an incredibly smooth process from start to finish. We needed the development of specific APIs for our architecture, and Clank Tech Group delivered exactly what we required with minimum impact on the project team.

Their service was outstanding. Demonstrating professionalism, extensive knowledge, and a keen attention to detail, We are grateful for their valuable input and would wholeheartedly recommend their services to anyone in need of similar assistance for their migration projects.
